

Waste Treatment

(Actual & Future Insights)

Our Objectives:

Reviva Expertise

Re-refining recycled wastes and petrochemical by-products to produce valuable end product

Waste management, recycle and safe disposal of residues

Engineering, construction & refurbishment

Maintenance & management of infrastructure.

Industrial cleaning & maintenance.

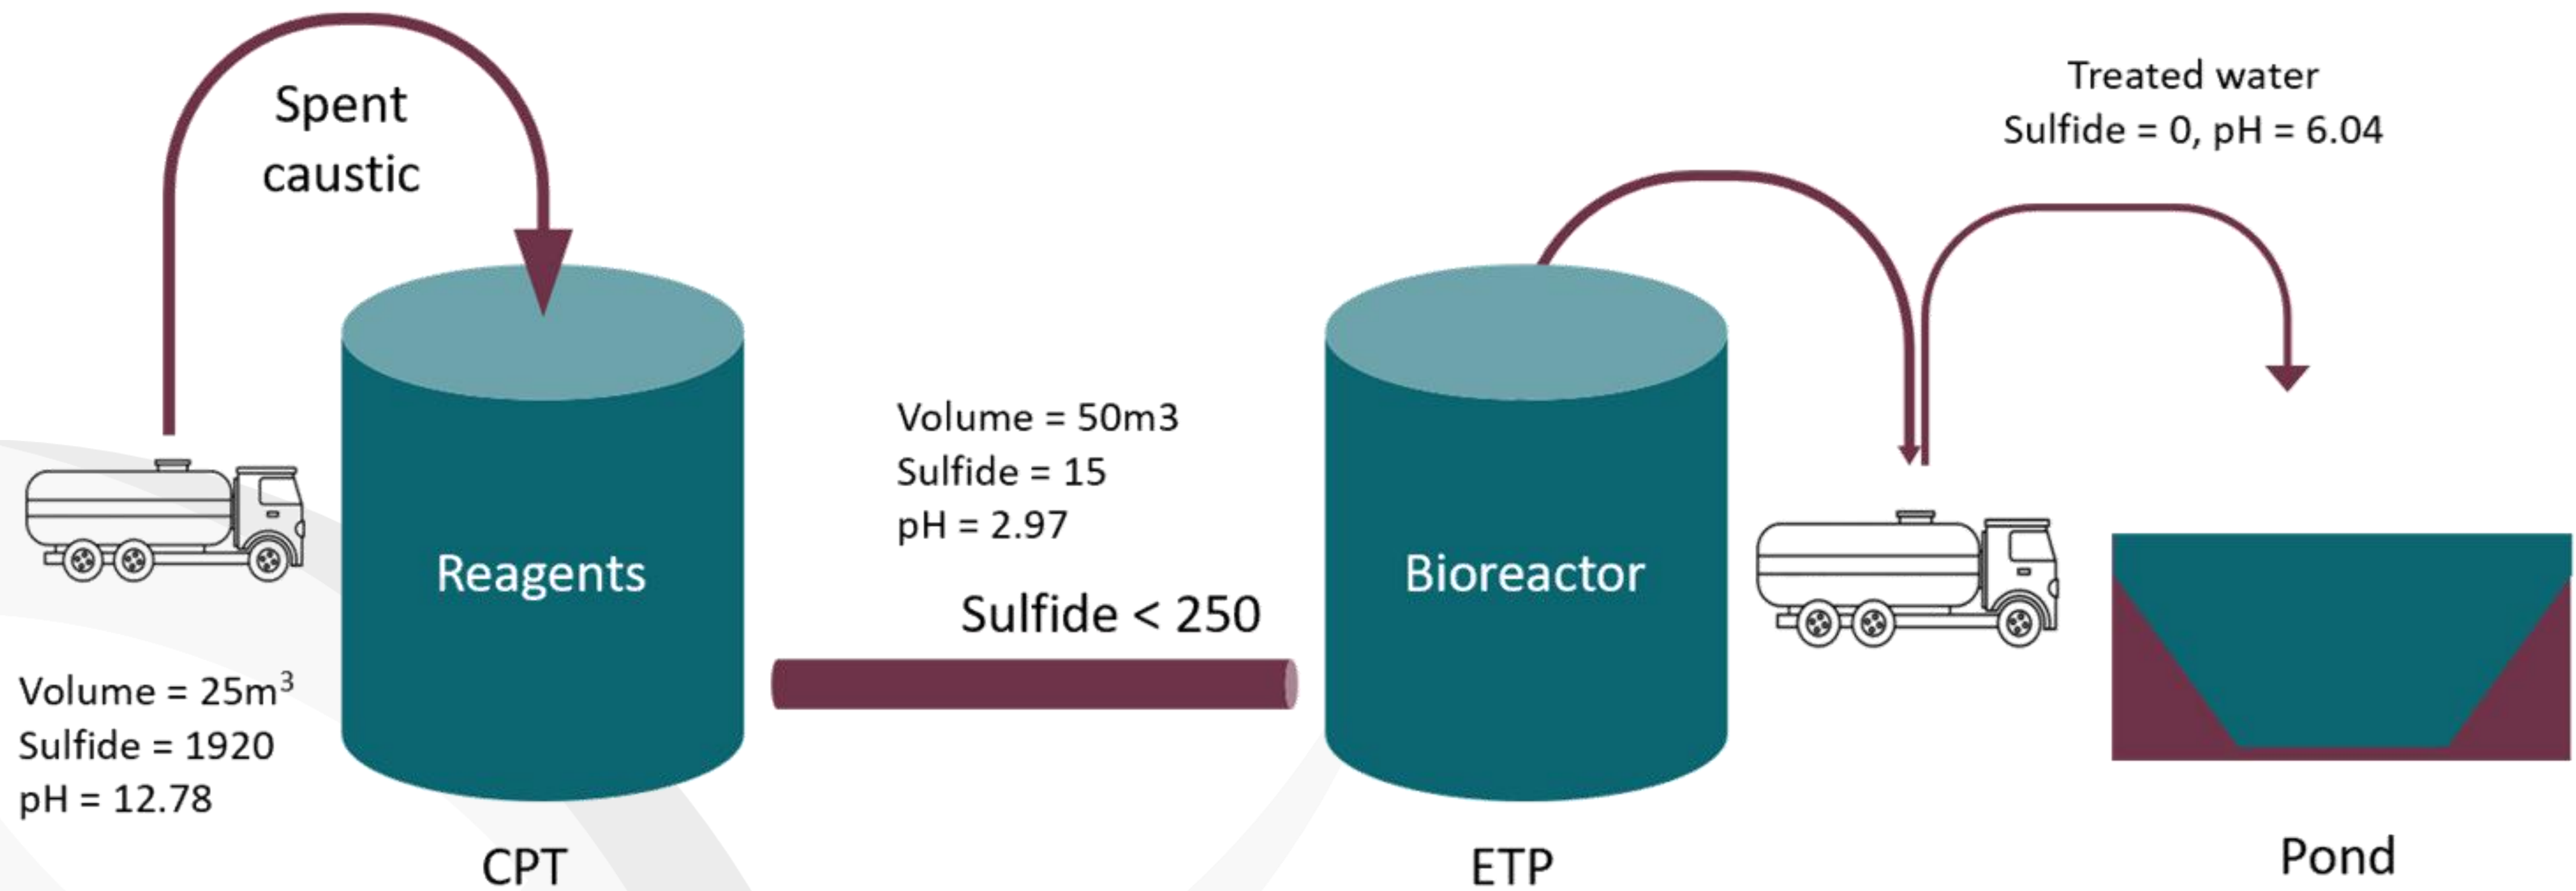

Environmental testing & studies

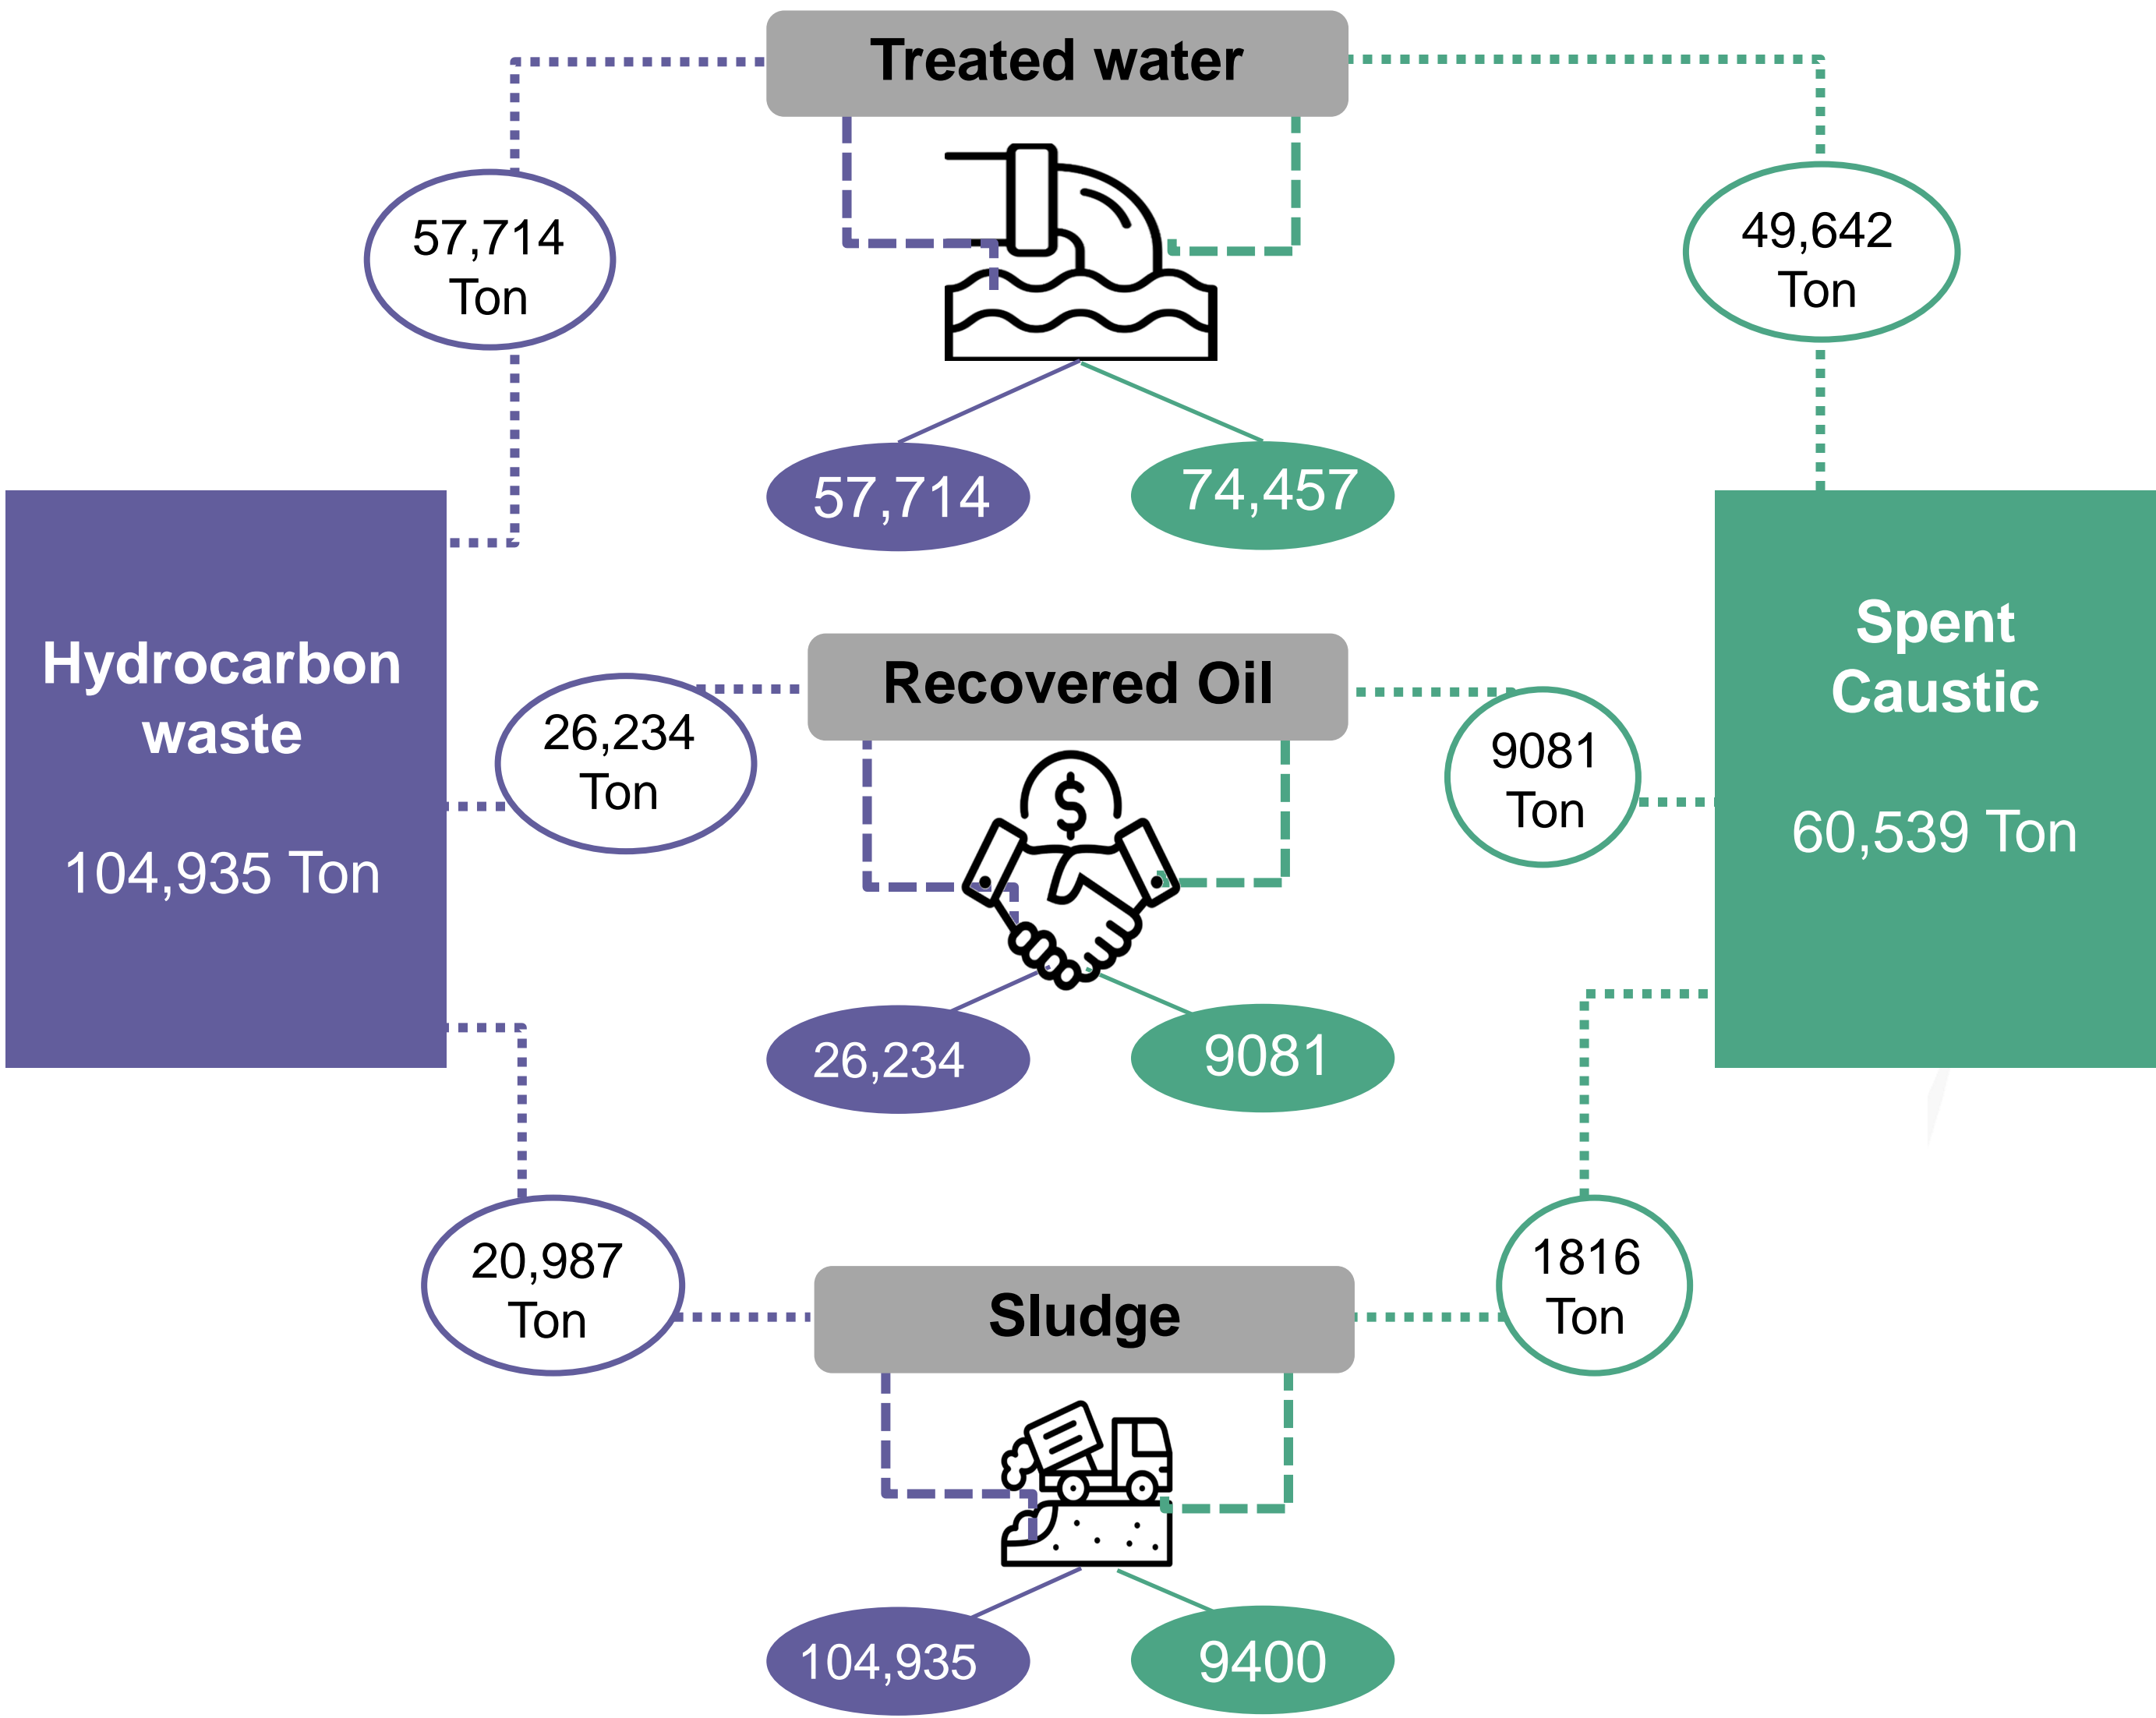

Transport & logistics

Spent Caustic Treatment

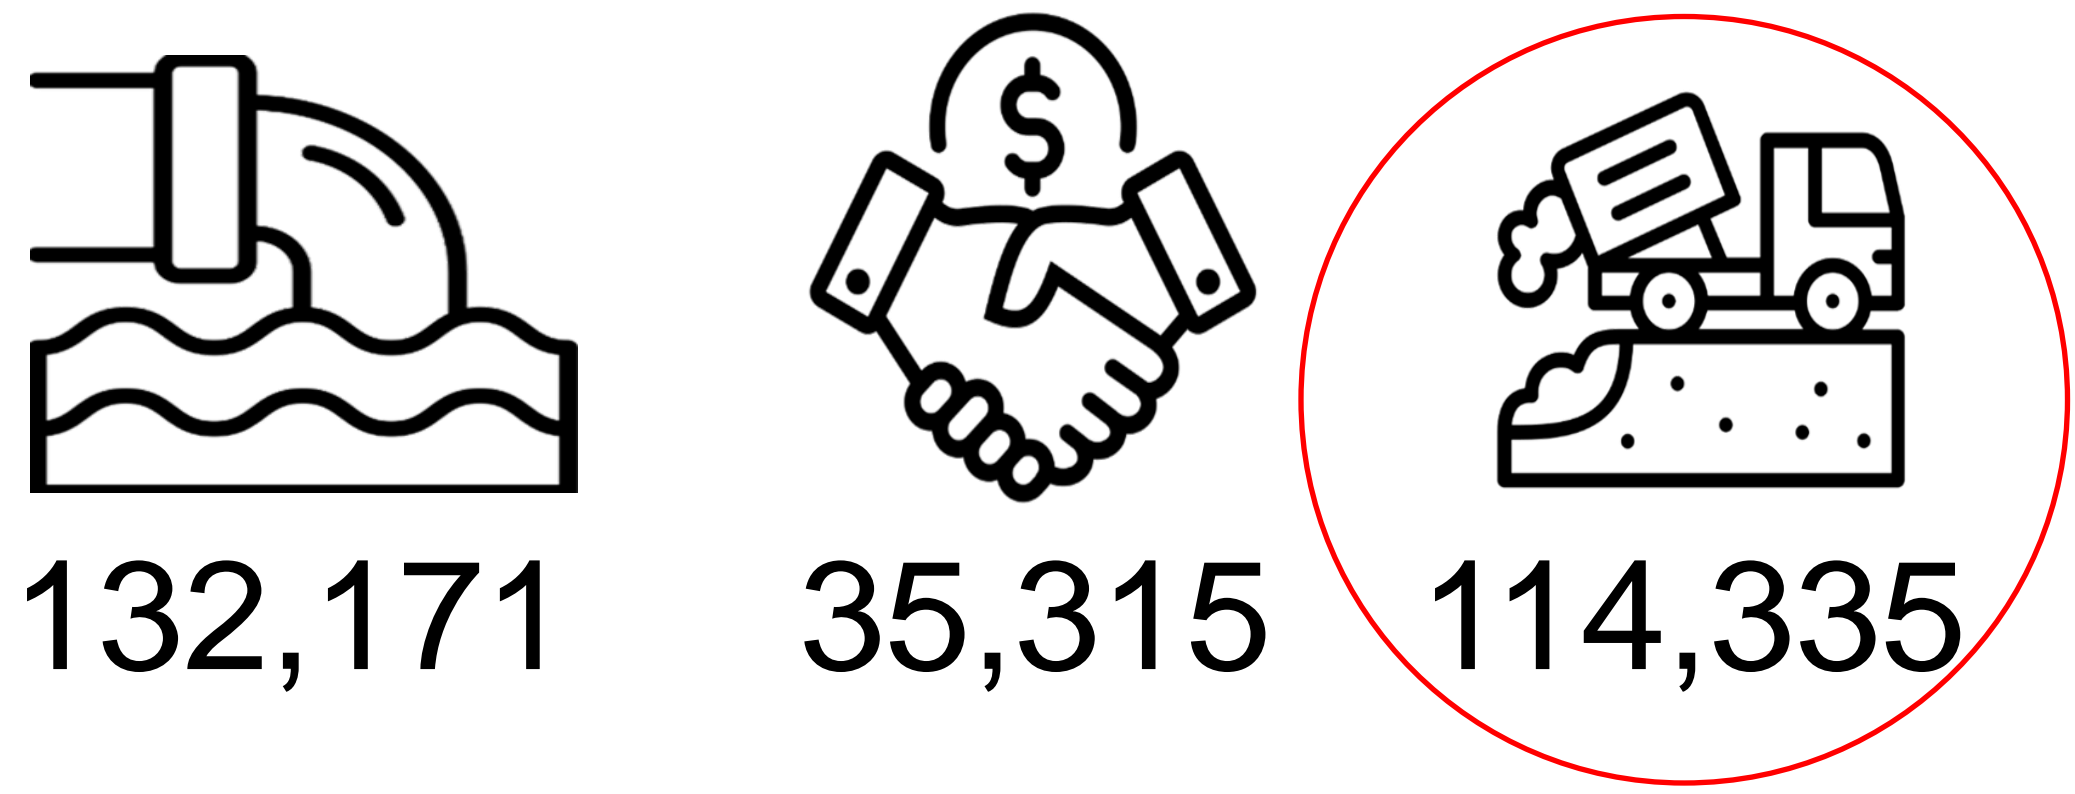

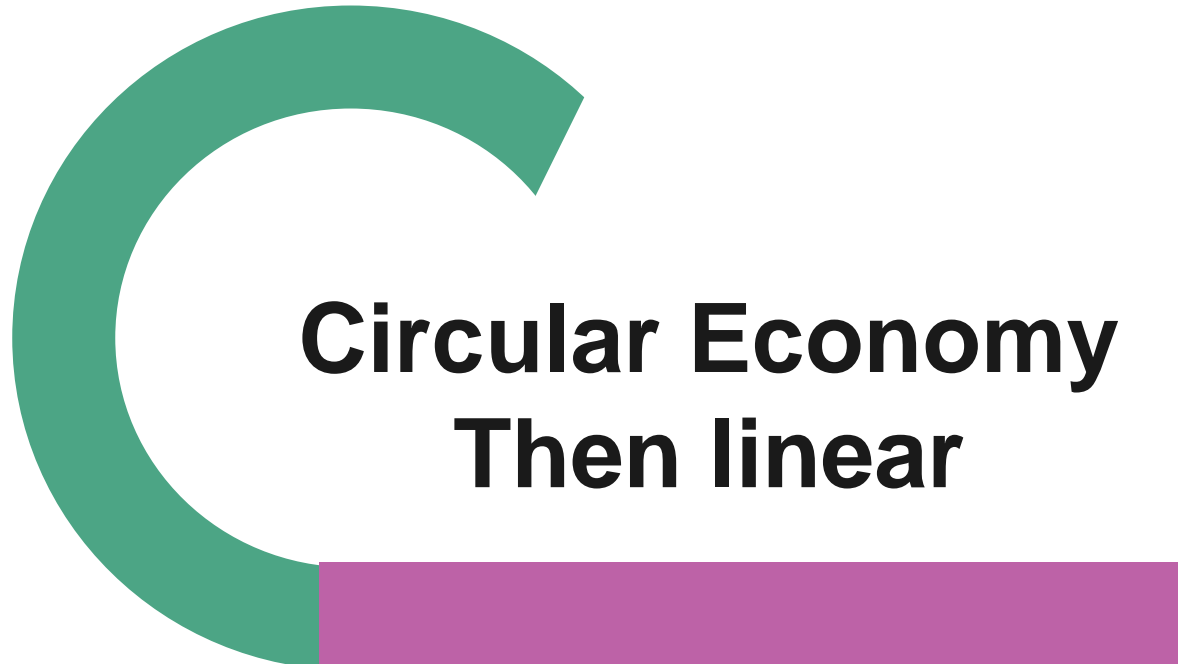

Actual Plan

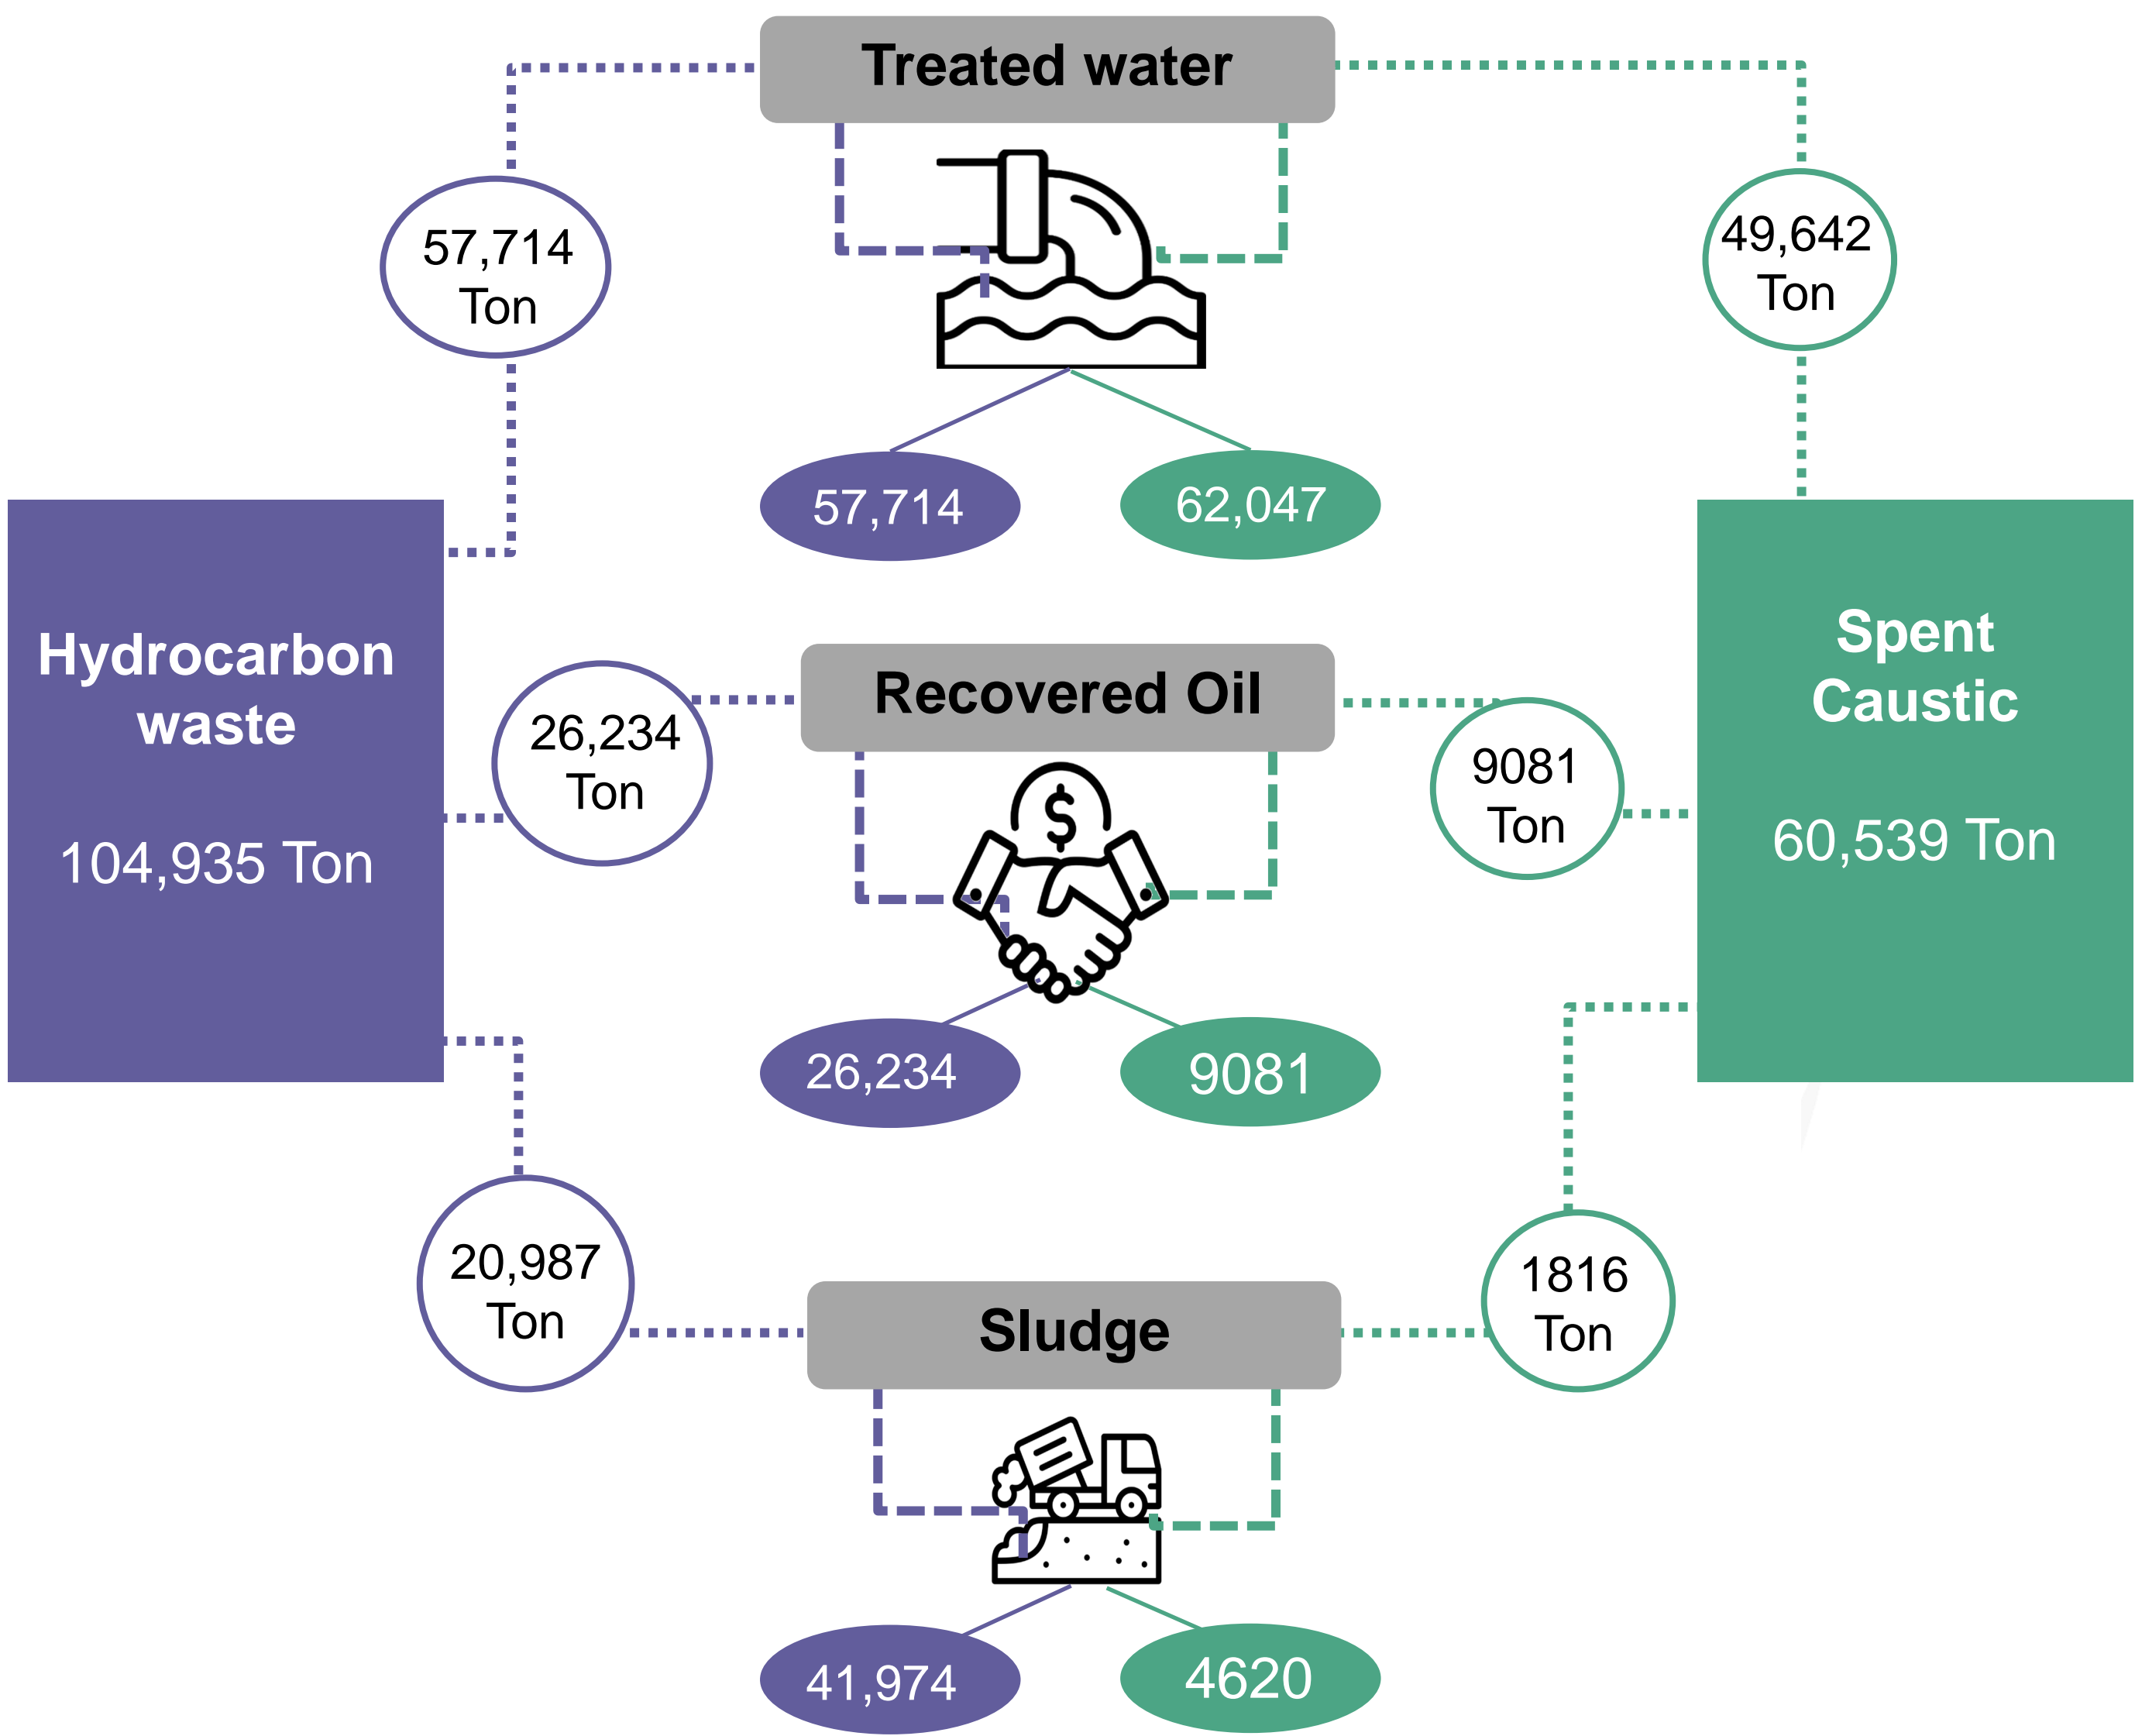

Challenges:

- Emissions: H₂S, Benzene, VOC, 3C & 3D
- Discharge treated water to the same pond with different tables.

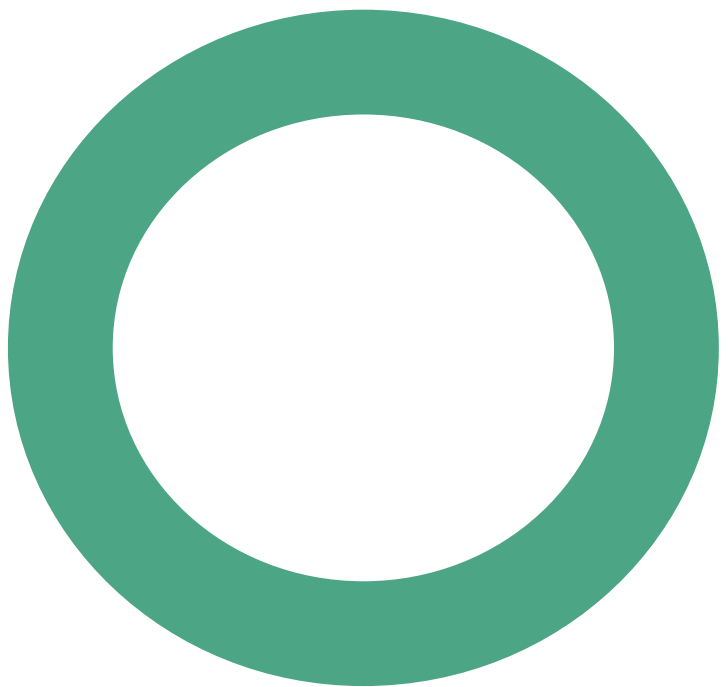

Future Plan

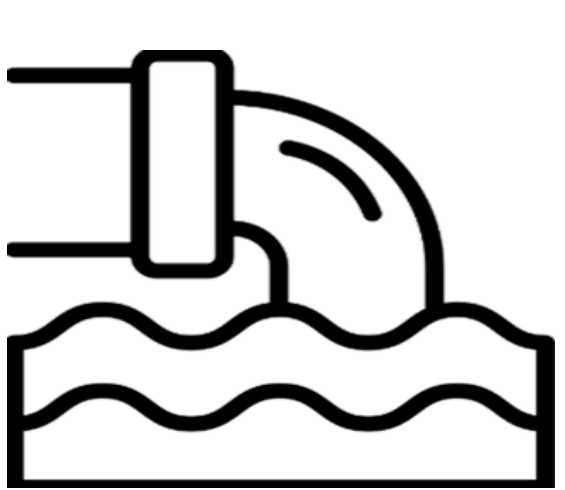

Features:

- Increasing landfill diversion.
- Enhancing the recovered material value
- Optimizing usage of treated water.
